Subject: Zoom

Just some info just in case you need it because I had to send multiple emails to get this info.

If anyone is using Zoom for classes, if you want to use advanced features like polls or breakout sessions, you have to make sure those things are turned on in the settings before you start the meeting.

When you login to uga.zoom.us, click on Settings in the leftside toolbar and scroll down and turn on all of the features you want to use.
